Abstract

A minimalist and clean L^AT_EX template tailored for mathematical notes, seminar expositions, and research manuscripts.

1 Introduction

Let K be a number field and $\mathcal{O}_K$ its ring of integers. We consider the arithmetic properties of schemes over $\mathrm{Spec} \mathcal{O}_K$.

Theorem 1.1. *Every ideal of $\mathcal{O}_K$ factors uniquely into prime ideals.*

Proof. Standard proof using Dedekind domains. □
